

Did You Save Energy Since Last October?

Last October, Warwick's town, three villages, three school districts, and the Florida and Albert Wisner libraries agreed to support Sustainable Warwick's 10% Challenge and committed to reducing their energy use. Now Sustainable Warwick would like to hear from individuals, nonprofits, and businesses in the Town of Warwick that reduced energy use. Would you fill out the form below to help us understand what people have done to reduce energy use? Please return to a member of Sustainable Warwick or mail to Sustainable Warwick, P.O. Box 1270, Warwick NY 10990.

Yes, I reduced some form of energy since October, 2010.

Name of person or organization: _____

Zip code _____

Phone or e-mail (optional--if we may contact you for a comment on the program):

I reduced energy by (check as many as apply):

- Lowering thermostat in cold weather
- Raising thermostat on air conditioning
- Conserving electricity
- Replacing incandescent bulbs with CFLs (compact fluorescents)
- Replacing appliances with more efficient models
- Buying a more fuel efficient car
- Driving fewer miles
- Improving building insulation and sealing
- Reducing hot water use
- Installing a solar hot water heater
- Installing photoelectric (solar) panels
- Other (please specify):

Do you know how much energy you saved? (Gallons of fuel oil or gasoline, cubic feet or therms of natural gas, or kWh of electricity)

Do you know the percentage of that form of energy you saved?

The details of this information will be kept private. We are interested in seeing how many people took steps to save energy, and approximately how much they saved. More information about saving energy can be found at sustainablewarwick.org. Thank you!
